LEDVANCE

OSRAM

RETAIL LAMPS PROGRAM 2025/2026

LEDVANCE is a licensee for the product trademark OSRAM for lamps & luminaire products in general lighting.

LEDVANCE
POWER THROUGH LIGHT

A STRONG PARTNER IN THE LIGHTING INDUSTRY

LEDVANCE is a prominent player in the lighting industry, known for its innovative lighting products and smart, interconnected lighting solutions. Drawing from our comprehensive understanding of the general illumination market, current technologies, and evolving customer demands, we are committed to meeting the specific needs of both direct and indirect customers.

As a reliable local partner, we take an active role in supporting your efforts to impress customers with high-quality, long-lasting lighting concepts. Our aim is to help boost your lighting sales by offering attractive, user-friendly, and intelligent products.

Together, we can collaboratively shape the future of light – with agility, courage, speed, and flexibility. Join us on this journey as we pave the way towards a brighter tomorrow.

OUR STRENGTHS ARE **YOUR ADVANTAGE**

COOPERATIVE
As a dedicated and collaborative partner, LEDVANCE boasts a vast, worldwide sales team and over a century of experience, ensuring we stand by your side at all times.

VERSATILE
Modern, smart, decorative, functional, robust and practical – our extensive portfolio meets customer requirements in all categories and virtually every area of application.

SALES-BOOSTING
Attract attention, encourage purchases. We offer targeted support for your sales with creative, pre-tested marketing concepts.

CARING
We are committed to contributing to a greener planet by reducing CO_2 emissions and waste through sustainable products, solutions and processes. We empower our customers to use light more efficiently to save energy and reduce their environmental footprint.

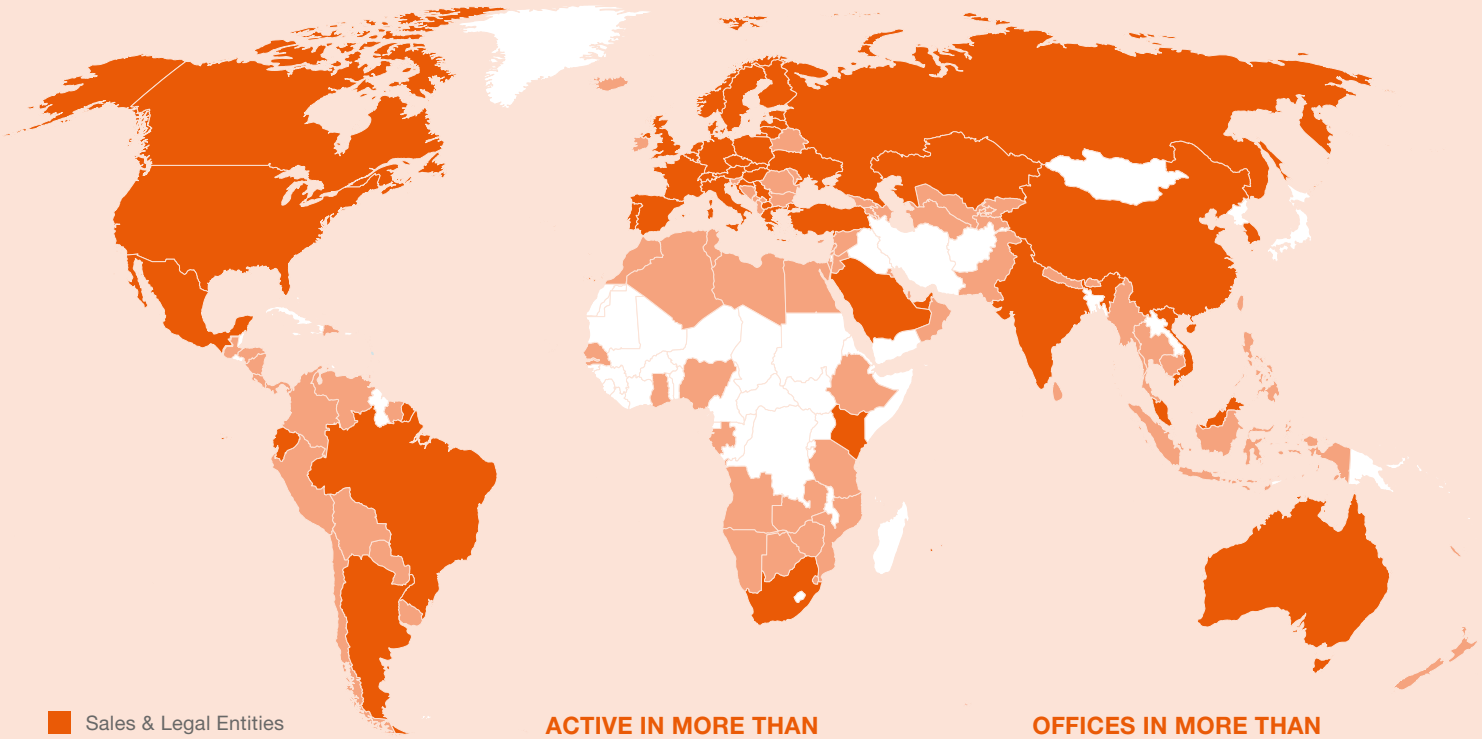

UNIQUE
Fresh, dynamic, high-quality and bold – we know at an early stage what interests customers and where lighting trends are heading. LEDVANCE is unmistakably LEDVANCE.

INNOVATION MEETS TRADITION
We embody progress and the passion to shape the future of lighting actively. By blending our courage to explore new paths with our experience from more than 100 years of lighting expertise, we lead the way forward.

ALL IN ONE
At LEDVANCE, we've got everything you need from a single source – LED luminaires, lamps, and Smart Home products. We offer you a wide range of innovative and market-driven solutions, setting new trends along the way.

FIRST-CHOICE PARTNER
As the perfect strategic ally, we offer an extensive portfolio, a robust sales network, and unparalleled global market access to fulfill all your requirements.

LED LAMPS FOR ALMOST EVERYTHING AND EVERYONE

With our comprehensive portfolio you can offer your customers a huge selection of products to cover virtually any requirement:

LED lamps in all classic shapes, LED reflector lamps, SMART+ lamps, NATURELOOP LED lamps, high efficiency LED lamps, LED comfort light, LED decorative lamps, LED lamps with attractive additional functions, special LED lamps, LED tubes and OSRAM DULUX® LED.

We are constantly revising our range and developing it further. Our portfolio of LED lamps has never been larger or more varied.

THREE LIGHT COLOURS — YOUR CUSTOMERS GET TO CHOOSE

From cosy and warm to functional and cool: with warm white, cool white and cool daylight, OSRAM branded LED lamps always have the right light colour.

LED LAMPS IN CLASSIC SHAPE AND REFLECTOR LAMPS

Lamp selection made easy with our quality categories: Segmenting the product range into clear quality levels helps your customers to quickly and easily find the ideal LED replacement for their needs.

LED SUPERSTAR

Dimmable[1] high-tech LED lamps for the highest demands

- Lifetime of up to 25 years[2]
- 4-year guarantee[3]
- LED SUPERSTAR reflectors: Very good colour rendering of CRI ≥ 90

LED STAR

Non-dimmable first-class LED lamps for versatile everyday use

- Lifetime of up to 15 years[2]
- 3-year guarantee[3]

SMART+

Our comprehensive range of digitally connectable SMART+ LED lamps works with Matter or Zigbee and covers all customer requirements for innovative smart home lighting.

NATURELOOP LED LAMPS

With our NATURELOOP LED lamps made of at least 50 % recycled plastic[4] (PCR) we are well and truly on our way to a sustainable circular economy:

New: We have expanded our PCR portfolio to include almost all LED Superstar and LED Star Heatsink products.

- Matt surface
- Long life of up to 15 000 hours
- 4-year guarantee[3] for dimmable lamps
- 3-year guarantee[3] for non-dimmable lamps

HIGH EFFICIENCY LED LAMPS

HIGH EFFICIENCY LED LAMPS can save up to 60 % energy compared to standard LED lamps and up to 93 % energy compared to conventional light bulbs:

- Different types – from 25 W to 150 W replacements
- Ultra-efficient luminous efficacy of at least 210 lm/W
- Very long life of up to 50 000 hours
- 5-year guarantee[3]

LED COMFORT LIGHT

LED COMFORT LIGHT offers energy-efficient LED lighting with the quality of natural daylight and an outstanding colour rendering of CRI ≥ 90.

FLAT LAMPS

The FLAT LAMP is a versatile, ultra-compact LED lamp with a slim design and customisable ring, perfect for hidden light sources and offering innovative dimming options.

DECORATIVE LED LAMPS

Coloured or glare-reduced light in classic designs that use LED filament technology.

LED LAMPS WITH ADDITIONAL FUNCTIONS

State-of-the-art LED lamps with attractive added functionality

- **LED STAR+ 3STEP DIM:** dimming without a dimmer
- **LED STAR+ GLOW DIM:** the color temperature changes when dimming
- **LED STAR+ RELAX & ACTIVE:** warm and cool light in one lamp
- **LED SUPERSTAR+ RELAX/ACTIVE/SLEEP:** Versatile lighting solution with three modes for warm, cold and dimmed light, easy to control using the light switch
- **CCT SELECT:** setting the colour temperature directly on the lamp
- **LED STAR+ DAYLIGHT and MOTION SENSOR:** Lamps with integrated daylight and/or motion sensors
- **LED RGBW REMOTE CONTROL:** coloured light with remote control

LED LAMPS FOR SPECIAL APPLICATIONS

- LED STAR GROW: to promote the growth process of indoor plants
- RECHARGEABLE LAMP: everyday lighting combined with a battery for emergency use
- RENOVATION LAMP: eliminates the need for extra pendulum sockets for temporary light use

SPECIAL LED LAMPS

High-quality LED lamps for special areas of application like LED SPECIAL PIN, SPECIAL LINE, SPECIAL T26 or SPECIAL T SLIM.

LED TUBES and OSRAM DULUX® LED

Whether for operation with CCG or ECG, our LED TUBES and OSRAM DULUX® LED are an energy-efficient replacement for all conventional fluorescent lamps:

- Quick, simple and safe relamping with no rewiring
- Instant 100 % light without warm-up and flickering
- Very long life of up to 30 000 hours
- 3-year guarantee[3]

[1] LED lamps can be operated on a variety of commercially available dimmers; details and results of compatability tests can be found at www.ledvance.com/consumer/services/downloads/ under the linked product technical information sheets | [2] Corresponds to an average service life of 15 000/25 000/30 000/50 000 hours at a daily operation of about 2.7 hours | [3] For the exact guarantee terms and conditions that apply to consumers, please refer to www.ledvance.com/consumer/services/guarantee | [4] Based on the plastic content of the product

PLASTIC-FREE
LED LAMP PACKAGING

A change for the better: by eliminating plastic from the packaging for our LED lamps we are saving 25 million blister packs a year. This is an effective contribution to reducing global plastic waste and protecting the environment.

100 % PLASTIC-FREE
100 % RECYCLABLE
80 % RECYCLED CARDBOARD

GOOD FOR THE ENVIRONMENT – GOOD FOR YOUR BUSINESS

Our LED lamp packaging is more than just environmentally friendly. With shelf-ready trays, stable design, integrated hanger tabs and clear consumer information, they ensure more efficient handling and greater productivity at the shelf.

REAR HANGER TAB
- Optimised shelf productivity compared with other hanging solutions and blisters
- Standardised euro hook perforation

LEAVES NO ROOM FOR DOUBT: CUT-OUT WINDOW WITHOUT PLASTIC
The consumer sees the cover, shape and finish of the lamp

STRONG PROTECTION FOR THE LAMP
- Cut-out window only on the front side
- No additional bottom opening for more stability

DOUBLE-FACING ARRANGEMENT
Stable and space-saving

CLEAR CONSUMER GUIDANCE ON THE FRONT OF THE TRAYS
With photo-realistic product image and informational labels for wattage, light colour and socket

REMOVABLE CARTON LID
- Strong protection and stability
- Fast merchandising
- Also plastic-free

EASY TO FIND:
NO TIME WASTED FINDING THE RIGHT PRODUCT

LED LABEL
Refers to latest lighting technology and energy savings

STRONG BRAND RECOGNITION
Thanks to the OSRAM band and orange design

ENERGY EFFICIENCY CLASS
The energy efficiency class is shown on the front of the packaging in accordance with EU regulation ELR

SOCKET IDENTIFICATION
Image as well as technical description

QUICK, CLEAR CONSUMER INFORMATION ON THE FRONT

- Wattage and reference wattage
- Lumens/beam angle
- Lifetime in years
- Light colour
- Dimmability (if relevant)

FIND THE PERFECT LED REPLACEMENT WITH OUR WATTAGE CONCEPT

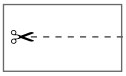

Your customers know how bright a 60 W light bulb is, for example. Now they are looking for alternatives that offer the same brightness. To help them find them, the front of our packaging shows the wattages they are familiar with from classic incandescent lamps: 25 W, 40 W, 60 W, 75 W, 100 W or 150 W. So they immediately know precisely which LED alternative to take.

INCANDESCENT LAMP	LED SUPERSTAR/ STAR CLASSIC	NEW ENERGY EFFICIENCY CLASS
15 W	**1.5 W**	F
25 W	**2.2–2.8 W**	E–G
40 W	**4.0–4.9 W**	E–F
60 W	**5.5–8.8 W**	D–F
75 W	**7.5–10.5 W**	D–F
100 W	**11–13 W**	D–E
150 W	**17–20 W**	D–E

The power consumption needed to replace the wattage of a traditional incandescent light bulb varies among LED lamps, hence a range is shown. The reason: The number of light-emitting diodes used varies from lamp type to lamp type.

SAFETY INFORMATION: SIMPLE, CLEAR, UNDERSTANDABLE

In 2004, the safety requirements for products began to be standardised throughout Europe. For consumers, this means more safety and transparency. With easy-to-understand symbols on our products, packaging and inserts, we provide clarity and confidence in decision-making on lamp purchases, independent of the language.

Open the packaging

Read the enclosed leaflet before use

Keep away from children

Fit only by gripping the integrated control housing

Do not touch the lamp with bare fingers

Caution: hot

Protect against splashes

Lamp with UV filter

Inner temperature range

Do not throw away with household waste

Only for indoor use

Disconnect the luminaire from the power before relamping

Only use in lamps with protective cover

Operation with shattered outer bulbs is not allowed

Special lamp, not suitable for use in household environments

Lamp can be continuously dimmed

Lamp cannot be dimmed

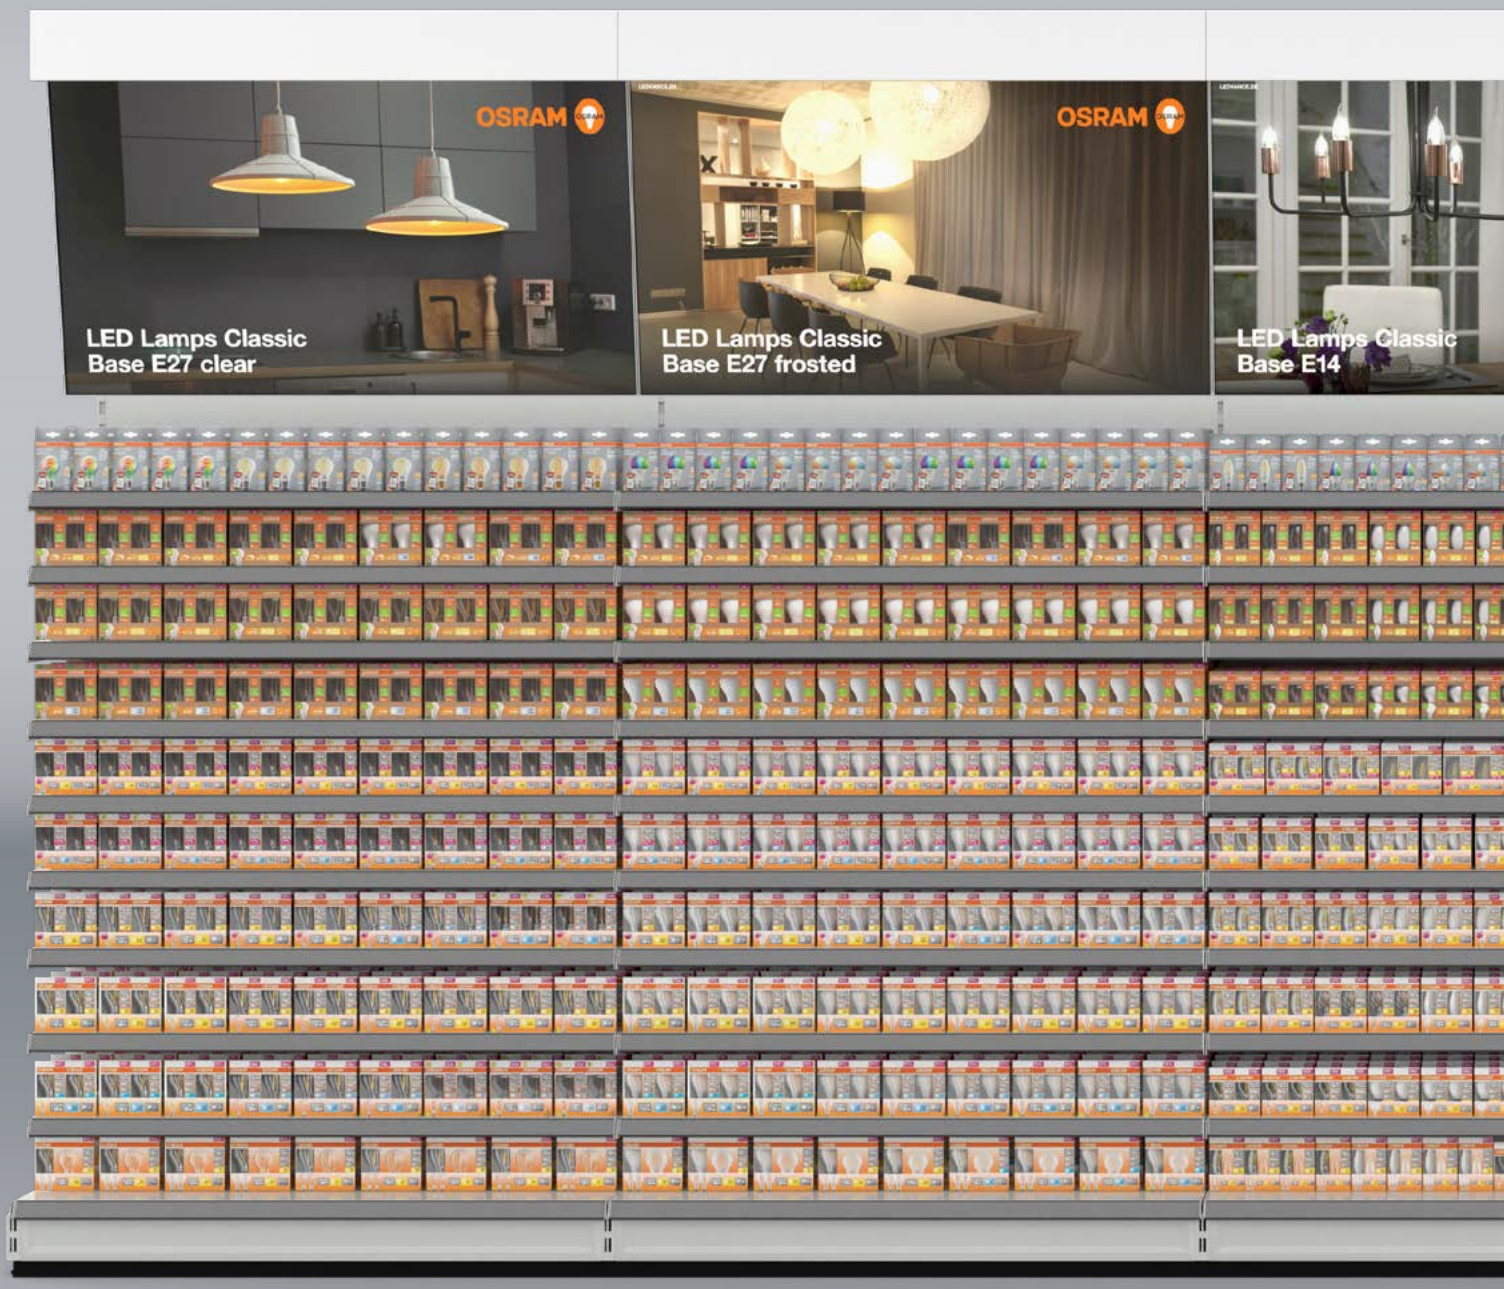

Lamp with limited dimming

For more detailed information about compatible dimmers: **www.ledvance.com/professional/services/led-lamps-compatibility**

Selection of pictograms used for lamps in OSRAM brand. Not all originate from the product safety directive; some are used for better understanding and for clarification purposes.

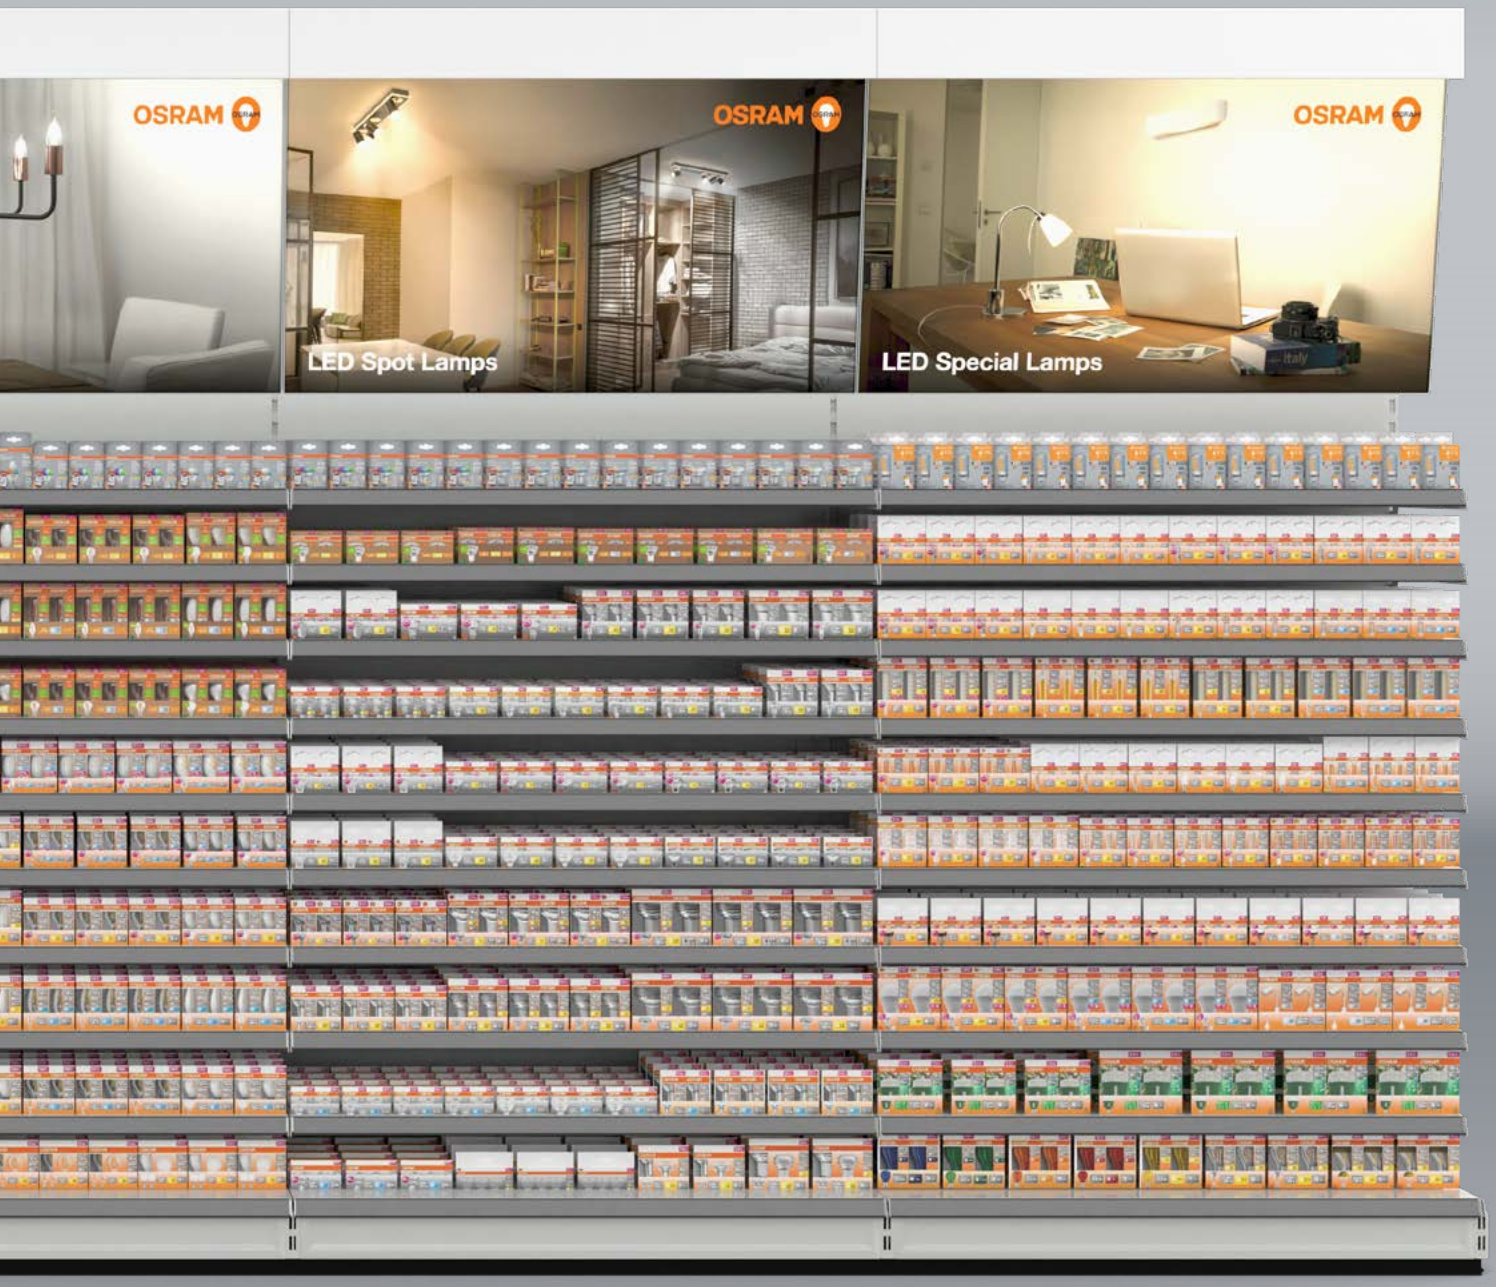

THE POS SHELF CONCEPT PERFECTLY ARRANGED

Search, locate, buy: our POS shelves have a consistent design to provide modern, effective consumer guidance. Their lighting attracts even those customers who are far away. Once they've arrived at the shelf, customers see at first glance attractive product application images that convey the homelike and aesthetic qualities of our LED lamps.

At the same time, the shelves are designed for maximum efficiency: shelf-ready trays or folding boxes on blister hooks ensure easy handling and maximum use of space. In the future, we'll also no longer be using plastics for our PoS shelf communication wherever possible.

Product presentation in shelf-ready trays on shelves

THE DISPLAYS TURN HEADS, STIMULATE PURCHASES

Attention-grabbing, attractive and stimulating: the high-quality design of our secondary placements attract attention, inspire with their emotional motif and motivate customers to buy.

SMART+ LAMPS

SMART+ MATTER 18

SMART+ ZIGBEE 22

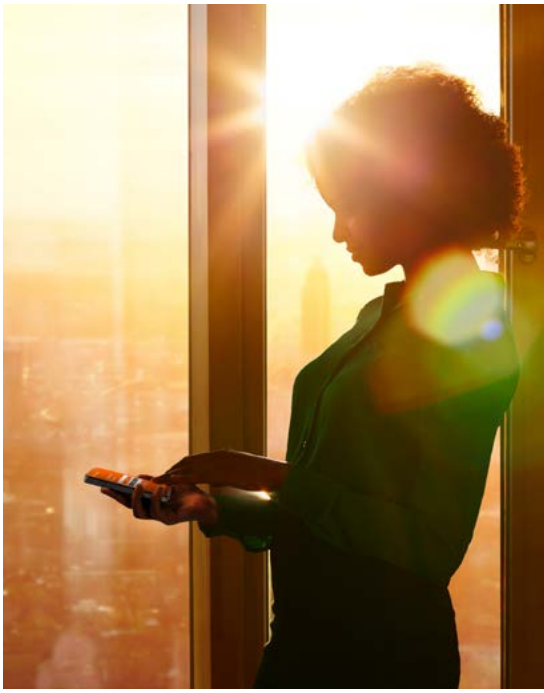

EXPERIENCE SEAMLESS: SMART HOME INTEGRATION WITH MATTER

Matter is a cross-manufacturer open communication standard developed by industry leaders such as Apple, Google, Amazon and Samsung that enables unparalleled compatibility and maximum convenience in smart home applications. Irrespective of the manufacturer it allows lamps, thermostats, plugs, sensors and other components to be combined as required, provided they comply with the Matter standard.

LEDVANCE is one of the first lighting companies to offer various products featuring Matter technology, including different lamp types in classic shapes or as spotlights, in filament designs or with heat sinks, and with E27, E14 or GU10 bases. The products are easy to recognise by the Matter logo and can be integrated into smart home applications without a gateway.

LED COMFORT LIGHT:
BETTER LIGHT – NATURALLY

LED COMFORT LIGHT lamps combine classic design with all the benefits of modern LED lamp technology. But above all, their impressive quality of light almost matches that of natural sunlight.

Major benefits at a glance:

- Natural light spectrum with outstanding colour rendering of CRI > 90
- Greatly reduced blue component – very close to natural sunlight
- Improved visual comfort and reduced eye strain
- Flickering and stroboscopic effects reduced to a minimum
- Classic A, B and P heat sink lamps now with CRI 97

LED REFLECTOR LAMPS: WE’VE GOT EVERY CUSTOMER REQUIREMENT COVERED

Modern LED light has long since established itself as the new standard in reflector lamps as well. With their high-quality full-glass design and innovative single optic for excellent light distribution, our LED reflector lamps fulfill customer needs brilliantly.

Our broad range of products includes all relevant wattages, dimmable and non dimmable lamps, and various light colours. OSRAM branded LED reflector lamps are also available with all bases and for all areas of application. In short: an ideal package of performance, design and quality!

FLAT LAMP:
COMPACT SHAPE, GREAT POTENTIAL

Invisible illumination, versatile customisation and convenient dimming

The Flat Lamp combines style and functionality with its ultra-compact design, featuring a flat diffuser ideal for luminaires where the light source should stay hidden. Each lamp includes two rings in black and white, to match the luminaire's colour for a seamless aesthetic.

It comes in warm or cool white options with either E27 or E14 bases. In some models the lamp also offers innovative 3-stage dimming, easily adjusted via the light switch, for versatile lighting control.

Thanks to its unique design, the OSRAM Flat Lamp is the elegant and unobtrusive choice for modern lighting solutions.

LED LAMPS WITH ADDITIONAL FUNCTION

The spectrum ranges from LED lamps with multi-stage adjustable colour temperature and brightness or with an integrated motion sensor to lamps that can dynamically change their light colour using a remote control.

LED STAR+ 3STEP DIM:
DIMMING WITHOUT A DIMMER

The clever 3STEP DIM technology makes it all possible: LED light can be adjusted to create a specific mood – without having to install a dimmer. The lamps can be dimmed in three stages: 100 %, 45 % and 15 %. This is easily controlled using a standard wall switch.

LED STAR+ GLOW DIM:
DIM DOWN FOR EXTRA WARM LIGHT

LED lamps with GLOW DIM technology don't just get darker when you dim them down: the light colour also changes from warm white (2700 K) to comfort warm white (up to 1800 K).

This lets your customers enjoy cosy feel-good lighting while saving maximum energy. The lamps are easy to control using a standard dimmer[1]; a remote control is not required.

[1] LED lamps can be operated with a wide variety of commercially available dimmers; for details and results from compatibility tests, please refer to www.ledvance.com/professional/services/led-lamps-compatibility/dimming-conformity and the additional technical product information sheets linked there

RELAX – ACTIVE – SLEEP: CREATE THE PERFECT AMBIANCE WITH A SIMPLE CLICK

The energy-efficient, functional and stylish LED SUPERSTAR+ RELAX/ACTIVE/SLEEP lamps are a versatile lighting solution for any room as they allow the lighting to be easily adapted to any need. A simple double-click on the wall switch is enough to change between the three Relax, Active and Sleep modes.

- **Relax:** warm white light (2 700 K) creates a calming atmosphere – perfect for relaxing after a long day or for enjoying a quiet evening
- **Active:** cold white light (4 000 K) provides an energising environment that is easy to focus in, ideal for working or learning
- **Sleep:** a gently subdued warm white light (2 700 K/40 lm) promotes relaxation and restful sleep

LED RGBW LAMPS WITH REMOTE CONTROL: LIGHT AS IF BY MAGIC

One light source — an infinite number of lighting moods and possibilities.

Countless functions can be controlled at the press of a button using an intuitive remote control: switching on and off, dimming, selecting between warm or cool white tones and light in diverse colours. Colour loops for dynamic colour changes and other effects are also possible. Light for an individual lifestyle.

LED STAR GROW: LED LIGHT TO PROMOTE PLANT GROWTH

To complement natural sunlight, LED STAR GROW lamps have a special colour spectrum that stimulates photosynthesis, promoting the growth of houseplants. The proportion of green and yellow light has been reduced to a level that can be absorbed by the plants which reduces the energy consumption of the lamps.

The new LED STAR ONE FOR ALL GROW also has an integrated switch that allows three different light spectrums to be set for the plant growth phases of sowing, growth and flowering.

ALWAYS READY, ALWAYS BRIGHT:
THE RECHARGEABLE LED LAMP

A clever idea that combines everyday lighting with an emergency power function. The LED SUPERSTAR+ CLASSIC A RECHARGEABLE lamp can be used in any E27 base. This innovative solution has a built-in battery that automatically recharges while the light is on. In the event of a power failure, the lamp turns into an emergency light using the supplied power cap, providing reliable lighting for up to three hours. The perfect choice for homes, offices and emergency provision.

- **2 in 1:** normal LED lamp and emergency light
- **Automatic recharging:** conveniently during operation in the E27 base
- **Battery life:** up to 3 hours of emergency power supply

STREAMLINED RENOVATION LIGHTING:
SAVE TIME AND COSTS WITH THE COMPACT RENOVATION LAMP

The compact renovation lamp is a time- and cost-saving solution for construction or renovation projects. Its integrated connected power wire and terminal block eliminates the need for extra pendulum sockets, streamlining installation and reducing electrician labour. The durable construction and secure terminal block in a secure box ensure reliable and safe operation.

- **Long lifespan:** up to 15 000 hours of illumination
- **Bright light output:** 1 055 lumens for optimal visibility
- **Cool white:** 4 000 K for natural and energising light

SPECIAL LED LAMPS:
INNOVATIVE SPECIALISTS

Highly efficient, robust and durable. Special applications are where modern LED technology truly reveals its strengths. Having added new lamp types to our range we offer you a comprehensive selection of innovative LED solutions for the most diverse lighting tasks – including perfect LED replacements for phased-out halogen lamps.

Our current highlights include reduced-size G9, G4 and GY6.35 LED pins, the new R7s made of glass, the decorative T26 which is now also dimmable, and the T SLIM in a reduced length.

LED TUBES

LED TUBES T8 EM 102

LED TUBE T8 UNIVERSAL 110

LED TUBE T5 112

LED TUBE T9 CIRCULAR EM 114

LED TUBES T8 EM:
PERFECT REPLACEMENT WITH MAXIMUM EFFICIENCY

LED TUBES T8 EM are energy-saving replacements for traditional T8 fluorescent lamps in luminaires with conventional control gear (CCG). The innovative LED tubes with G13 bases are made of glass with metal end caps and ensure flicker-free light. All LED TUBES have energy efficiency, durability and first-class light quality in common. In addition to a wide range of standard versions in 438 to 1500 mm lengths, LEDVANCE offers LED tubes for special applications.

- **LED TUBE T8 EM ENERGY EFFICIENCY CLASS A:** highly efficient at 210 lm/W and extremely durable with a life of up to 50000 hours; saves up to 72 % energy compared to a conventional fluorescent tube.
- **LED TUBE T8 EM ULTRA OUTPUT (UO):** with up to 3500 lm for high lighting requirements.
- **LED TUBE T8 EM MOTION SENSOR (MS):** with an integrated microwave motion sensor; automatically dims to 20 % brightness after 5 minutes of inactivity and switches off completely after 7 minutes. Detection range up to 5 m, also suitable for closed luminaires.
- **LED TUBE T8 EM FLUORA:** LED replacement for traditional T8 FLUORA fluorescent lamps. Supports plant growth.
- **LED TUBE T8 EM BIO-LUMILUX:** LED replacement for traditional BIOLUX T8 fluorescent lamps. Light similar to daylight with a CRI of 95, making it ideal for environments requiring natural light.

LED TUBE T8 UNIVERSAL:
THE UNIVERSAL MULTITALENT FOR ANY LUMINAIRE TYPE

Whether conventional control gear (CCG) with a starter or electronic control gear (ECG) without a starter, OSRAM LED TUBES T8 UNIVERSAL are a good fit and are recommended as a reliable and versatile solution.

- Wide G13 socket portfolio compatible with both conventional (CCG) and many standard electronic control gear systems (ECG[1])
- Available in traditional tube lengths of 600, 1 200, and 1 500 mm, providing up to 2 800 lm for high lighting demands
- Made from full glass with plastic end caps and delivers flicker-free illumination
- A perfect, all-in-one LED replacement for any lighting setup

[1] Before installing the replacement LED lamp it should be checked for compatibility with the existing ECG: http://ledvance.com/ecg-compatibility (compatibility list: LED Tube T8 Universal, T8 HF, T5 HF GEN11 ballast compatibility). End users who cannot do this themselves should contact an electrician.

LED TUBE T5:
SLIM AND POWERFUL

The LED TUBE T5 is an ideal LED replacement for T5 fluorescent tubes with a G5 base in luminaires with compatible electronic control gear (ECG)[1] and saves up to 50% energy compared to conventional T5 fluorescent tubes.

- The full-glass portfolio includes various lengths and versions such as the T5 HO (High Output) for an ultra-efficient light output of up to 155 lm/W
- Low-flicker light and splinter protection included
- Offered in warm white und cool white, with a long lifespan of 30 000 hours

[1] Before installing the replacement LED lamp it should be checked for compatibility with the existing ECG: http://ledvance.com/ecg-compatibility (compatibility list: LED Tube T8 Universal, T8 HF, T5 HF GEN11 ballast compatibility). End users who cannot do this themselves should contact an electrician.

LED TUBE T9 CIRCULAR EM:
A WELL-ROUNDED SOLUTION

Sustainability is a key value for LEDVANCE. That's why we also offer the LED TUBE T9 CIRCULAR EM as a modern, efficient replacement for conventional T9 ring tubes.

- Ideal LED replacement for conventional T9 ring tubes with a G10Q socket for CCG luminaires
- Available as a direct substitute for 22 W, 32 W, and 40 W models, achieving up to 45 % energy savings compared to traditional T9 fluorescent lamps
- Offered in warm white, cool white, and cool daylight, with a long lifespan of 30 000 hours

OSRAM DULUX® LED

OSRAM DULUX® LED 118

OSRAM DULUX® LED:
THE PERFECT LAMP FOR EVERY FIXTURE

With a wide range of OSRAM DULUX® LEDs, LEDVANCE offers versatile lighting solutions with energy savings of up to 60 % compared to conventional pin-base compact fluorescent lamps.

One highlight is the OSRAM DULUX® LED D VERTICAL EM with a G24d base and a beam angle of 300° which is specially designed for vertical applications and ensures optimal illumination.

- Instant 100 % light, no warm-up time
- 2 to 3 times longer life than traditional compact fluorescent lamps
- Available in cool white and warm white light colour

HALOGEN LAMPS

HALOGEN LAMPS 128

HALOGEN LAMPS: EU-COMPLIANT QUALITY OF LIGHT

As a result of the EU Ecodesign Regulation (SLR), most halogen lamps have now been withdrawn from the market. LEDVANCE already offers high-quality, energy-efficient LED alternatives for each of these halogen lamps.

However, selected halogen lamps such as HALOLINE R7s, HALOSTAR and HALOPIN OVEN are still available. This allows you to continue to meet specific customer requirements with products of proven top quality.

SPECIAL LIGHT BULBS FOR OVENS: STAY COOL WHEN IT GETS HOT

Oven lamps are subject to very special requirements. Whether you are baking, roasting or grilling, they need to reliably illuminate the cooking chamber in extreme temperatures of up to 300°C without a drop in performance. Our special light bulbs are designed specifically for this application:

- Consistently reliable performance thanks to heat resistance up to 300 °C
- Very long life even when used frequently
- High energy efficiency through low consumption at high luminosity
- Easy replacement as they are compatible with all common oven types

Leave nothing to chance in your kitchen with oven lamps from OSRAM.
