16600AM

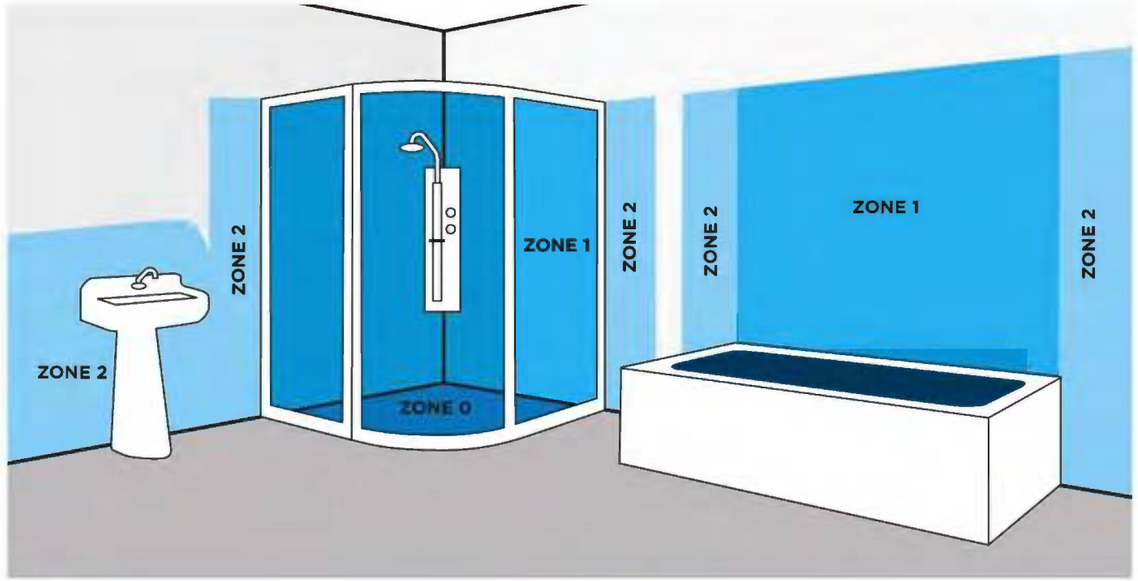

18801AM

PL1055-5-3CCT

IP Rating = Ingress Protection Rating

Zone 0

Inside the bath or shower. IP rating must protect against immersion/total immersion in water (IPX7/IP67).

Zone 1

Above the bath or shower to a height of 2.25m. IP rating must protect against water spray from all directions (IPX5/IP65).

Zone 2

This is the area stretching to 0.6m outside of the bath or shower.
IP rating must protect against water spray from all directions (IPX4/IP44).

Outside Zone

Outside Zones - (Previously Zone 3, which was removed under the 17th Edition Wiring Regulations BS7671)
No IP Rating required.

IP Ratings Explained

1	Protected against solid objects over 50mm, e.g. accidental touch by hands.
2	Protected against solid objects over 12mm, e.g. fingers.
3	Protected against solid objects over 2.5mm, e.g. tools & wires.
4	Protected against solid objects over 1mm, e.g. wires & nails.
5	Protected against dust limited ingress, no harmful deposits.
6	Totally protected against dust.

EXAMPLE: IP65

1st Digit: 6 (Totally protected against dust)

2nd Digit: 5 (Protected against low pressure jet of water from all directions, limited ingress permitted.

1	Protected against vertically falling drops of water, e.g. condensation.
2	Protected against direct sprays of water up to 15 degrees from the vertical.
3	Protected against direct sprays of water up to 60 degrees from the vertical.
4	Protected against water splashed from all directions, limited ingress permitted.
5	Protected against low pressure jets of water from all directions, limited ingress permitted.
6	Protected against strong jets of water, e.g. on ships deck, limited ingress permitted.
7	Protected against the effects of temporary immersion between 15cm and 1m.
8	Protected against long periods of immersion under pressure

Colour Temperature & Lumens

Colour temperature/Kelvin (K) is a measurement of the warmth or coolness of light.

The look and feel of a space can be greatly affected by colour temperature. Therefore, it is important to choose the right colour temperature based on the mood you want to create.

Based on the (K) numbered scale, the higher the colour temperature, the cooler, more energising light will be.

A lower colour temperature will produce a warmer, more relaxing glow. The colour temperature (K) should be considered carefully to satisfy a room's desired purpose, mood and style.

Lumens Explained: (lm) are a measure of the total amount of visible light (to the human eye) from a lamp or light source. The higher the lumen the "brighter" the lamp will appear.

NOTE: All Kelvins and Lumen outputs (raw data) are quoted with a tolerance of 10%

Candle Light 1800K	Warm White 2700K-3000K	Daylight 6500K

Product Dimensions

- **TH** = Total Height from lowest to highest point and once item is fully extended
- **H** = Height of the fixed part of any light
- **W**= Width
- **L**= Length

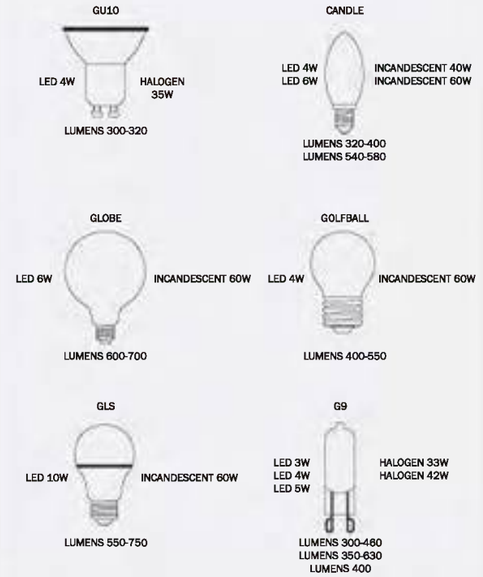

Ceiling Plate Dimensions

- **L**= Length of ceiling plate

Typical LED Watts

About Us

Eight decades of craftsmanship, reimagined for modern living.
LUX&BELLE, our story is rooted in a legacy that spans generations. Inspired by a tradition of excellence established in 1945, we continue to create lighting that brings timeless elegance into contemporary spaces.

Each collection is thoughtfully designed to balance heritage craftsmanship with modern sophistication, drawing influence from architecture, fashion, and fine art. From statement chandeliers to understated designs, every piece is crafted to elevate the atmosphere it inhabits.

More than illumination, our designs create mood, character, and lasting impressions. Discover a world where beauty and function exist in perfect harmony, and every light becomes part of a larger story.

project collection

the 2027 Project Collection is a toolkit crafted for lighting specifiers. Tailored to optimise lighting performance, it features architecturally designed solutions that align perfectly with project requirements. By seamlessly integrating technical innovation with creative vision, we deliver solutions that elevate both interior and exterior spaces.

For detailed drawings and specifications along with help & advice, visit www.projectcollection.co.uk

useful information

GU10/Mini GU10 items

GU10 products are designed to fit a standard GU10 lamp length of 53mm. The specified minimum recess depth dimensions for our products are based on this standard length, ensuring clear installation guidelines. If a product is designed for a longer GU10 lamp length, this will be noted in the key features on the product page.

GU10 lamps are not included.

Mini GU10 lamps, also known as GU10 MR11, share the same lamp cap as standard GU10s. However, mini GU10 lamps have a smaller face diameter of only 35mm, making them ideal for applications requiring a smaller luminaire body.

Mini GU10 lamps are not included but can be purchased separately in a choice of CCT. See pg. P202 for more details.

Dimming

All dimmable products are compatible with mains leading and/or trailing edge dimming. We test all our dimmable products for compatibility with Varilight V-pro dimmer modules. We cannot guarantee the compatibility of other leading / trailing edge dimmers.

Lightsource/Luminaire lumens

Lightsource lumens measure the total light emitted directly from the light source, i.e. the LED PCB, without accounting for any losses due to the fixture's design. Luminaire lumens, on the other hand, measure the total light output from the complete luminaire, including any losses caused by the luminaire body, lenses, reflectors, or diffusers. When the product has a replaceable LED lightsource, the lightsource lumens are quoted on each page.

Colour Rendering Index (CRI)

All products have a minimum CRI >80. CRI>90 products are indicated on the page.

Living finishes

Living finishes change over time. Anodised finishes may appear slightly darker after a period of 3 years due to continued oxidation of the surface of the product.

Warranty

All products are manufactured and inspected in order to meet the technical and quality standards demanded by the market. These come with a standard 5-year warranty out of the box.

We understand that coastal environments can subject products to unique challenges, such as saltwater exposure and extreme weather conditions, our 5-year warranty includes all outdoor products with this icon, when used in locations up to 1km from the coast.

Products with this icon are limited stock items

Use solid plaster trimless lighting when ...

you have an already plastered wall or ceiling, and you're not planning to skim the surface again.

After the product installed it is a decorator's job to infill the gap with a flexible filler / caulk, sand to a smooth finish and paint the surface of the ceiling, including the interior of the fitting.

installing solid plaster trimless lighting

See pages below for our solid plaster ranges:

Ceiling

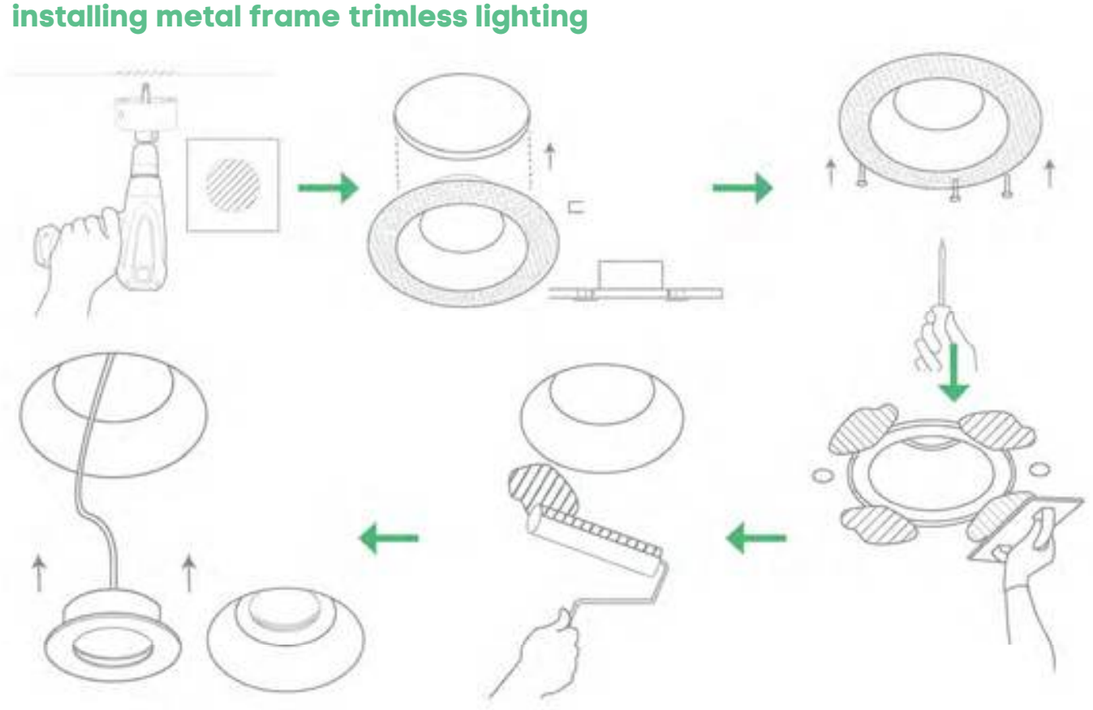

Renne	P84
Rome	P86

Use metal trimless lighting when ...

you are installing into a wall or ceiling that has yet to be skimmed, or will be reskimmed.

After the metal frame is installed in the wall or ceiling the plasterer skims the surface with a 3mm layer of plaster skim. The frames have a 3mm lip for the plasterer to skim up to.

installing metal frame trimless lighting

See pages below for our solid plaster ranges:

Ceiling

Polo trimless	P81

21W SMD LED
1260 lumens

CLASS 2 | IP54 | 3000K | 230 VOLTS

Key Features

- Dark grey
- PC / ABS Material
- Corrosion resistant
- Suitable for use in coastal areas
- Wall or ceiling mounted

trafalgar

All bathroom lighting installations must comply to the guidelines set out in Amendment 1 of the 17th edition of the IEE Wiring Regulations (BS7671). The bathroom is divided into zones, with prescribed minimum IP ratings for the light fittings in each zone.

IP rating = Ingress Protection rating.

zone 0

The area inside the bath or shower tray. Fittings must be rated at IPX7 or higher (protected against immersion in water).

zone 1

The area above the bath or shower up to a height of 2.25 metres. Fittings must be rated at IPX5 or higher (protected from jets of water).

zone 2

Covers an area 0.6 metres wide immediately next to, and all around Zone 1. The 60cm area around washbasins should also be treated as zone 2. The minimum rating is IPX4. If there is a likelihood of water jets being used for cleaning purposes in Zone 2, a minimum of IPX5 is required.

outside zone

Covers any area outside Zones 0, 1 and 2. There is no IP requirement in this zone. Bathrooms are allowed to contain a socket outlet, this must be located 3 metres outside Zone 1. Lighting circuits and any socket-outlet circuit in a room containing a bath and/or shower must be provided with 30mA RCD protection.

For detailed drawings and specifications along with help & advice, visit www.projectcollection.co.uk

guide to constant current LEDs

Constant current LED items can be identified because the operating power is quoted in milliamps (mA). Project Collection constant current items are either 350mA or 700mA.

Do I need a separate driver?

Yes, choose a 350mA or 700mA driver to suit the number of fittings you want to run, and whether you want to dim the item. Fittings must be wired in series.

Is this dimmable?

Yes, if used with a dimmable 350mA driver and a compatible dimmer.

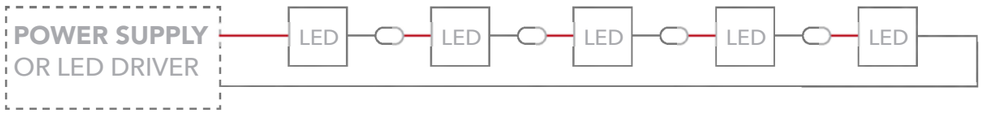

How do I work out which driver I need?

Identify the current, 350mA or 700mA.
Note the wattage of each item, e.g 1W, 3W

item wattage x no. of items = total wattage
select your driver to suit your requirements

How do I wire this?

In series. See the drivers listed below, the product fitting instructions or the drawing below

* NOTE: All these drivers must be wired in series
